

Editor's Note

By the Grace of Allah 2nd Issue of Pakistan Orthodontic Journal which is an official publication of Pakistan Association of Orthodontists has been published and in your hands. We are thankful to the members who have contributed towards this academic activity in the previous issue and made the publication possible. We were encouraged with the healthy remarks from senior members of Orthodontic community, the young orthodontic scholars and students regarding the 1st issue of POJ. This encouragement gave us strength for the 2nd issue of POJ. We are thankful to all those who have made contribution in the current issue of the journal. This time not only the number of articles has been increased rather we have two international articles and I think this is an honor for the association & POJ and proves the quality of the publication that still being in infancy it had gained international strength.

We are also thankful to all those who have contributed by giving advertisements in the previous and current issues. This time formal Orthodontic Review Board has also been added giving further strength to the publication.

We hope that the academic & financial contributions will continue in future thereby improving this knowledge sharing process. Hope that the association will be able to get it recognized with PM&DC & HEC in time.

Wishing Good Luck to all members
